|     | Antibody Set    | F22K4-3                                                           | R-PLEX Mouse Complement C5a Antibody Set                 |
| 95  | Protocol        | R-PLEX Product Inserts are available at https://www.mesoscale.com |                                                          |

R-PLEX<sup>®</sup> Antibody Sets and Assays provide an expanded menu of electrochemiluminescence reagents for biomarker discovery and development. The Antibody Sets include a matched, biotinylated capture and SULFO-TAG™ conjugated detection antibody pair and Calibrator for the quick and easy development of highly sensitive immunoassays. R-PLEX Assays add diluents, MSD GOLD™ Read Buffer B, and either MSD GOLD small spot streptavidin QuickPlex or SECTOR plates, providing a complete set of components to develop and run an assay. R-PLEX Assays with QuickPlex plates can only be read on MESO<sup>®</sup> QuickPlex Q 60MM instruments. R-PLEX Assays with SECTOR plates can be read on all MESO SECTOR<sup>®</sup> and MESO QuickPlex<sup>®</sup> SQ 120/120MM instruments.

# **Representative Calibration Curve and Sensitivity**

| Calibrator Stock (20X)                                                     | 70,000 pg/mL |
|----------------------------------------------------------------------------|--------------|
| Calibrator Standard 1 (top of curve);<br>20-fold Calibrator stock dilution | 3,500 pg/mL  |
| LLOD                                                                       | 0.96 pg/mL   |

Representative data using the primary diluent pair in singleplex is presented above. The calibration curve was fitted with a 4-parameter logistic (or sigmoidal dose-response) model with a  $1/Y^2$  weighting. The lower limit of detection (LLOD) is a calculated concentration corresponding to the signal 2.5 standard deviations above the background (zero Calibrator).

For developing individual assays using R-PLEX Antibody Sets or Assays, please refer to the R-PLEX Antibody Sets & Singleplex Assays product insert. For multiplex assay development using R-PLEX Antibody Sets, use the R-PLEX Antibody Sets & Multiplex Assays product insert. For multiplexing a combination of R-PLEX and U-PLEX® Antibody Sets, refer to the U-PLEX Development Pack product insert. The detailed instruction manuals as well as the R-PLEX assay datasheets are available at <a href="https://www.mesoscale.com">https://www.mesoscale.com</a>.

## **Sample Dilution**

The R-PLEX Mouse Complement C5a Antibody Set has been tested with the following sample type(s) at the specified dilution in assay diluent.

| Sample Type | Recommended Fold Dilution |  |
|-------------|---------------------------|--|
| Serum       | 10,000                    |  |
| EDTA Plasma | 8                         |  |

The fold dilution specified is a suggested dilution. We recommend that sample dilution and other assay parameters be optimized before running samples.

## Source

| Calibrator       | Recombinant Mouse Complement C5a expressed in <i>E. coli</i>            |  |
|------------------|-------------------------------------------------------------------------|--|
| Antibodies       | Capture antibody - rat monoclonal, detection antibody - goat polyclonal |  |
| Assay Generation | A                                                                       |  |

# **Recommended Assay Components**

The following items are recommended for developing assays using R-PLEX Antibody Sets.

## **Plates for Singleplex Assay Development**

Plates are available in packs of 1, 5, 30, 120, and 510.

| Description                                               | Catalog No. | Included in: |
|-----------------------------------------------------------|-------------|--------------|
| MSD GOLD 96-well Small Spot Streptavidin SECTOR Plates    | L45SA       | K152K4R-2    |
| MSD GOLD 96-well Small Spot Streptavidin QuickPlex Plates | L4BSA       | K152K4R-22   |

## Buffers

| Description                        | Catalog No. | Included in: |
|------------------------------------|-------------|--------------|
| Diluent 100 (50 mL)                | R50AA-4     | K152K4R      |
| MSD GOLD Read Buffer B (90 mL)     | R60AM-2     | K152K4R      |
| MSD Wash Buffer (20X, 100 mL)      | R61AA-1     | -            |
| MSD Tris Wash Buffer (10X, 200 mL) | R61TX-2     | -            |

# **Diluent Compatibility**

The R-PLEX Mouse Complement C5a Antibody Set has been tested with the following diluent pair(s). The primary diluent pair was used for generating the data shown and is included in the R-PLEX Mouse Complement C5a Assay. Alternate diluent pairs may be considered for use with R-PLEX Antibody Sets, based on the sample type.

| Tested Diluent Pair  | Assay Diluent |             | Antibody Diluent |             |
|----------------------|---------------|-------------|------------------|-------------|
| Tostou Diluciit Pali | Description   | Catalog No. | Description      | Catalog No. |
| Primary              | Diluent 41    | R50AH       | Diluent 45       | R50AI       |
| Alternate 1          | Diluent 42    | R50AK       | Diluent 40       | R50AJ       |

Diluents sufficient to run 40 samples per plate in duplicate with up to 10-fold sample dilution are provided with R-PLEX assays.

Additional assay diluent may be necessary for samples that are diluted greater than 10-fold and can be ordered separately. Diluent 100 may be used in place of assay diluent for samples that require high dilution. Testing of different diluents can help optimize assays for specific experimental conditions and sample types.

MSD offers a range of assay and antibody diluents for separate purchase. Please view our website at <u>www.mesoscale.com/R-PLEX</u> for more details on compatible diluents for R-PLEX assays.
