## MESO SCALE DISCOVERY® Labeled Reporters

# MSD® SULFO-TAG Labeled Anti-Ubiquitinylated Protein Antibody

Size	Part Number	Volume
50 μg	R32AU-5	100 μL
200 μg	R32AU-1	400 μL

Description	MSD SULFO-TAG™ labeled Anti-Ubiquitinylated Protein Antibody may be used as a primary detection reagent to generate electrochemiluminescence in MESOSCALE DISCOVERY assays. It allows the user to detect ubiquitinylated proteins.
Isotype	lgG1
Specificity	MSD SULFO-TAG labeled Anti-Ubiquitinylated Protein Antibody is specific for ubiquitin-protein conjugates and shows no reactivity with free ubiquitin. The antibody recognizes both mono- and poly-ubiquitinylated species.
Host species	Mouse
Protein Concentration	The Antibody is supplied as 500 $\mu$ g/mL solution in Phosphate Buffered Saline (PBS) containing 2% Bovine Serum Albumin, 0.05% Azide and 0.02% Kathon CG.
Storage	MSD SULFO-TAG labeled Anti-Ubiquitinylated Protein Antibody should be stored at 2-8°C, shielded from light. It should be diluted to the working concentration only prior to immediate use.
Stability	Under recommended storage conditions, MSD SULFO-TAG labeled Anti-Ubiquitinylated Protein Antibody is stable until the expiration date on the label. Short term exposure of SULFO-TAG antibody to ambient light when carrying out assays is generally not a concern.
Recommended Dilution(s)	Suggested dilution concentrations range from $0.2-2~\mu g/mL$ for initial assay development. As a starting point, MSD recommends diluting MSD SULFO-TAG labeled Anti-Ubiquitinylated Protein Antibody to $1~\mu g/mL$ and incubating for 1 hour ( $25\mu L/well$ ). If background signals are higher than desired, reduce the concentration of MSD SULFO-TAG labeled Anti-Ubiquitinylated Protein Antibody to $0.5~\mu g/mL$ . Optimal concentrations may be determined by the researcher for each application.
